

WLAN Camera

00176648 Surveillance Camera, WLAN Outdoor Camera, Rechargeable Battery, Solar, Reco

Highlighttext:

- With the surveillance camera controlled via app and voice command, monitor outdoor areas such as the house, yard, garden and hard-to-reach points - independently of the power supply thanks to batteries and solar power
- Keep an eye on even remote corners thanks to solar power: when the outdoor camera is powered via the solar module, virtually autonomous operation is possible, making it ideal for places that are not often visited, such as barns and stables
- Wireless and straightforward: camera surveillance without tiresome power cable routing - with a battery life of four months, this is ideal for monitoring hard-to-access or rarely-visited areas
- WLAN surveillance camera responds to movements: if the camera detects movement, you can be notified via push notification, automatically trigger recording or switch on a WLAN light, for example
- Detailed images in the dark: during the night, infra-red night vision means you can still rely on camera surveillance
- Always track what's happening in front of the camera: when movement is detected, video recording starts automatically - either save locally to micro-SD cards up to 128 GB or to a chargeable cloud account, ensuring no recorded material is lost
- 2-way audio: a microphone and speaker allows communication via the WLAN outdoor camera, e.g. over a mobile phone with the postman, even when you're not at home
- Razor-sharp images: whoever is creeping around your property, with images from the outdoor camera in Full HD 1080p, you'll spot everything and everyone
- Whether it be the sofa or the sun lounger: with the Hama Smart Home app and WLAN camera, you have control over your property, garden and front door at all times, no matter where you are
- Whether it be Amazon Alex, Google Assistant or Apple Siri: easily display the live image from the WLAN outdoor camera on devices with a screen using voice controls
- Our surveillance camera works without any gateway (hub): you don't need an additional device, and you save on extra costs since the camera establishes a direct WiFi connection with the router
- Step by step to the Smart Home: with the Hama Smart Home app, you can expand and network your smart home with any number of Hama Smart Home products
- Simple installation on your own WiFi network: since no hub is required, your devices can be set up in just a few minutes
- High compatibility: works with Amazon Alexa, Google Assistant, Amazon Echo Show and Google Nest Hub, iOS and Android. Can also be connected to all Alexa and Google Assistant-compatible smart home products from other manufacturers
- To charge the outdoor camera battery, remove it from the magnetic holder and connect it using the USB charging cable to a port on a USB power supply unit or charge it on a PC/laptop
- Motion detection, e.g. link to an outdoor light or alarm siren
- Live view: monitor with real-time video what's happening around the house or garden
- For outdoors (IP 65): protected against water jets, the outdoor camera can be attached without concern and discreetly to façades
- Multi-user capability: multiple users can access the outdoor camera at the same time - handy when you're on holiday, for example
- The security camera can be used to deter burglary and vandalism, but also to watch over children playing in the garden, pets or horse stables
- Your data is stored exclusively on German servers

System Requirements:

- Operating system: Android 6.0 and iOS 12.0 or later

Note for Consumers:

Amazon Alexa/Google Assistant:

To do this, the Alexa skill "Hama Smart Home" must have been activated in the Alexa App/"Hama Smart Home" service must have been activated in the Google Home App. The user account for the Hama Smart Home app is then connected Alexa / Google.

It allows the video display of the WiFi camera to be shown when an Amazon / Google loudspeaker with screen is being used.

WLAN Camera**00176648 Surveillance Camera, WLAN Outdoor Camera, Rechargeable Battery, Solar, Reco****Technical characteristics:**

- Colour: Black
- Shade of colour: Black
- Signal Transmission: WiFi
- Frequency Range: 2.4 GHz
- Maximum hardware resolution: 1920 x 1080 Pixels
- Memory Capacity: 128 GB
- Online storage capable: Yes
- Resolution: 1920 x 1080 (Full HD)
- Storage Medium: microSD
- Wireless Encryption: WPA2
- Additional Functions: Night vision
- Ambient Temperature during Operation: ca. -10°C to ca. +50°C
- Angle of coverage: 130 °
- Cloud storage capable: Yes
- IP protection class: IP65 (protection against dust entry and continuous rain)
- Sensors: Motion Sensor
- Special Feature: Built-In microphone
- Voice Assistant: Amazon Alexa (AVS), Google Home
- Depth: 6 cm
- Height: 10 cm
- Width: 5.7 cm
- Power Supply: Power Supply Unit (5V)

Delivery:

- 1 surveillance camera
- 1 solar panel incl. holder
- 2 Li ion batteries 18650
- 1 magnetic holder
- 1 micro-USB cable
- 1 silicon protective sleeve
- Mounting hardware
- 1 quick reference guide
- 1 safety instructions
