

LENOVO™ MICROSAVER™ 2.0 DUAL HEAD CABLE LOCK

EVEN SLEEKER DUAL-HEAD
SECURITY FOR THINNER PC'S
AND ACCESSORIES.

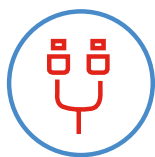

Lenovo™

SMALLER LOCKS. NO COMPROMISE FOR MULTIPLE ASSET SECURITY

The MicroSaver™ 2.0 Dual Head Cable Lock by Lenovo offers the same peace-of-mind physical security as our previous locks, but with an even smaller lock head, providing security to even the thinnest laptops, docks, monitors and valuable accessories. Physical security is the first line of defense in asset and data protection, and the MicroSaver™ 2.0 Cable Lock by Lenovo with its slim pivoting head, and steel cable design makes that first line of defense even stronger. And, an integrated secondary slim lock head makes it easier to secure peripherals like monitors with the same lock.

WHY YOU SHOULD BUY THE LENOVO MICROSAVER™ 2.0 DUAL HEAD CABLE LOCK

Slimmer Dual Pivot Head Design

At only 10 mm (0.39") thick, the MicroSaver™ 2.0 Dual Head Cable Lock offers two incredibly thin lockheads to keep ever thinner laptops, convertibles, and other peripherals physically safe. A 180° hinge provides greater range of movement, making it easier to insert the key and does not prohibit use of adjacent ports.

Featherlight Carbon Steel Cable

Carbon steel offers the same theft-resistance as thicker cable locks, but with less weight and more flexibility. At 2.5 meters (8.2 feet) long, you get greater mobility with uncompromised security.

Industry Standard Compatibility

The MicroSaver™ 2.0 Dual Head Cable Lock is compatible with most Lenovo laptops, desktops, docks and monitors that have a Kensington® security slot. The same security slot is found on many market PC as well, making physical security, regardless of which PC you're using, even easier.

THE LENOVO MICROSAVER™ 2.0 DUAL HEAD CABLE LOCK IS BEST SUITED FOR

1

Industries that deal with a large amount of sensitive data, like consulting, finance, and healthcare.

2

Office environments or retail spaces that have a lot of external customers or visitors.

3

Companies that commonly deploy monitors with laptops and desktop to employees and desire a single security solution.
