

Q-riser 90 Circular

Circular monitor stand

With the Q-Riser 90 circular monitor stand, we are introducing a sustainable version of our own acrylate product.

All characteristics of the acrylate version of the Q-Riser 90 are preserved.

We advise having a screen that can easily be adjusted and tilted so that every user can adjust its height.

Monitor stand made from plastic bottles, sustainable & ergonomic

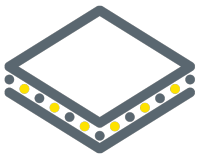

BakkerElkhuizen goes circular. With the Q-Riser 90 circular monitor stand, we are introducing a sustainable version of our own acrylate product. This laptop stand consists of compressed material made from recycled plastic bottles. By reusing plastic bottles, we are doing our part to reduce the amount of waste on land and in our oceans.

An overview of the benefits

Recycled material

Our Q-riser 90 Circular Monitor Stand consists of 60% recycled material (3.2 recycled PET bottles), but is completely recyclable!

Circular

Plastic bottles are collected and processed into 'flakes'. These are processed into 'granulate'. This granulate eventually becomes a PET felt board. If you no longer use your product, you can return it to us for recycling. In short, 100% circular.

Soft, yet strong!

Although the material appears soft, no compromises have been made for the required properties such as load-bearing capacity. These products are also very strong, just like acrylic!

Price

This sustainable product does not cost more than the acrylate version of the same product.

Colours

These products are available in different colors. We have light grey and green in our range as standard. We are happy to get in touch with you for other colors.

At the right height

An optimal monitor position leads to less discomfort and complaints on the neck. Placing the monitor too low can lead to (strong) bending of the neck, as a result of which a higher muscle tension in the neck muscles.

Knowledge Center

An ergonomic workspace enhances the comfort and productivity of DSE workers. It is easy to create the ideal workspace with a few minor adjustments. We develop and supply high-quality monitor stands for better and healthier workspaces...
