Connector RJ45 Cat6 STP Field Assembly

Article number: 4033848

The JR45 connector for field assembly is easily connected without any special tools required and delivers high-quality data transfers. The sturdy zinc die-cast casing ensures excellent electromagnetic compatibility (EMC) and is ideal for industrial environments. IDC connection technology and low-resistance contacts guarantee a secure and reliable connection of cables with up to 9 mm diameter and an AWG22 to AWG27 wire gauge.

- Connector for splice and wire cables (AWG 22-27)
- Fully shielded zinc die-cast casing
- No special tools needed
- For a 6-9 mm wire gauge
- Can be re-attached to cables up to 10 times (5 times with AWG 27/7)
- Strain relief using cable binders
